

TECHNICAL DATA SHEET

Version: 2025.05.EN

Scuff Free MT film

PRODUCT DESCRIPTION

Scuff Free MT film is a matte BOPP film designed for thermal lamination. The film has a special layer protecting its surface against scratches. After application the surface of the film can be UV lacquered or hot-stamped as well as glued. The adhesive layer enables easy and durable application at high speeds on all laminating machines. Thanks to these properties Scuff Free MT film can be successfully used in the production of packaging, bookbinding and other job related products

SPECIFICATIONS

Properties	MU	Typical value	Comments
Surface effect	-	Matt	-
Thickness	µm	30	(+/-2µm)
Roll width max.	mm	2000	(+/-2mm)
Yield	m ² /kg	37,00	-
Unit weight	g/m ²	27,00	-
Surface tension min.	dyn/cm	40	ASTM D 2578
Gloss max.	%	8	-
Lamination temperature	°C	110-120	-
Standard roll length	m	1500 / 2400	-

INTENDED USE

Type of application: thermal lamination

STORAGE CONDITIONS AND SHELF LIFE

Products should be stored away from extreme heat, cold, moisture and direct sunlight. Recommended storage conditions 5 – 30°C and relative humidity 20 – 70%. Shelf life is 6 months from the date on the label.

ADDITIONAL INFORMATION

The data presented reflect our current state of knowledge and are intended for informational purposes only. The specified parameters reflect typical values and do not represent limit values. Given the number of factors beyond our control, we cannot guarantee the properties or suitability of the products for each individual case of application. For these reasons, no legal claims may be derived from this technical specification sheet. We reserve the right to update the technical specification sheet at any time without obligation to inform you. The product is not classified as hazardous, we recommend reading the declaration of conformity before use. Dispose of in accordance with local and national regulations.
